

# Connectivity made simple.

The smart way to connect the people, devices and applications that power your business.

## Voice

Build voice capabilities for your VoIP infrastructure over our private, global network.

## Call Control

Build sophisticated and responsive calling experiences into your own applications.

## Messaging

Programmatically send and receive SMS to inform and engage your customers.

## Global Numbers

Instantly search for and provision local and toll-free numbers from around the world.

## Networking

Reach the cloud wherever you are, and easily transport data between global locations.

## Wireless

Connect globally on a private LTE network with automatic carrier switching.

## How businesses are using Telnyx

### ✔ Contact Center

Automate and optimize your call flows to better manage customer conversations.

### ✔ Managed Services

Save time with instant number provisioning and automated porting.

### ✔ Call Tracking

Attribute calls to marketing channels to effectively manage campaign ROI.

### ✔ Multi-Cloud

Easily build and deploy private, direct connections with all major cloud providers.

### ✔ Two-Factor Authentication

Use SMS to verify customer credentials and keep your data safe.

### ✔ Secure IoT

Build IoT products that connect any device, anywhere in the world, with a single SIM.

# The Telnyx difference

## An enterprise-grade platform

Our private, secure network keeps customer data safe from malicious threats on the public internet.

### Global Coverage

Telnyx has a purpose-built global IP network, meaning greater reliability and security with lower latency.

### Granular Control

Our self-service portal and APIs give you granular-level, real-time control over every aspect of your experience.

### Transparent Pricing

We offer competitive “no-middleman” pricing with automatic volume and commitment discounts.

### 24/7 Support

Our team of in-house engineers is available around the clock for troubleshooting and support.
